

Constitutional pigments conforming to global standards

SERICITE LQ-15

SERICITE LQ-15 is a silk mica with a silky sheen and a silky feel. With its excellent whiteness and extremely low impurity content, it can be used as a global constitutional pigment.

Composition

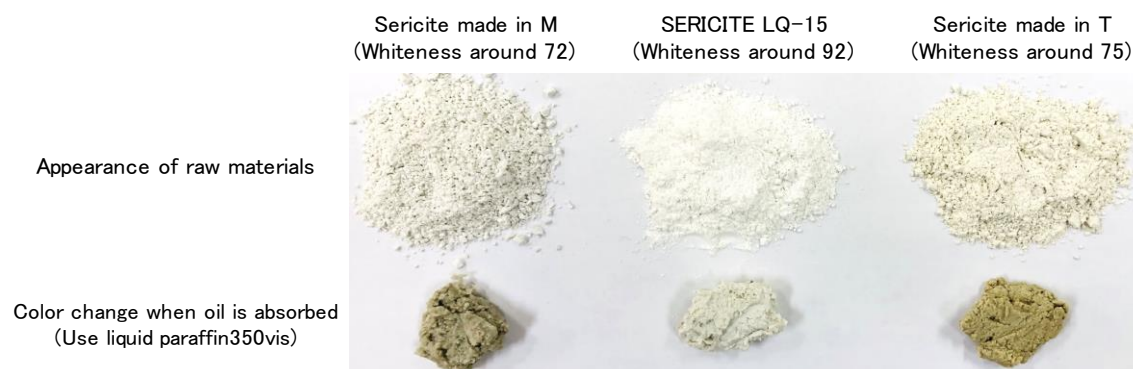

Chemical name : Potassium, Aluminium Silicate Hydrate
INCI : MICA
CAS No. : 12001-26-2

Features

- It can give a silky and slippery feel unique to sericite.
- Compared to other mica minerals, the content of heavy metals is very low, so it complies with the regulations of various countries.
- The whiteness is very high, and there is a difference in color, especially when the oil is absorbed.
- It is a "natural mineral raw material" as defined by ISO 16128.

【 Comparison of the appearances 】

【 Heavy Metal Standards 】

Lead	Arsenic	Antimony	Cadmium	Mercury
≤10ppm	≤2ppm	≤5ppm	≤3ppm	≤1ppm

【 Conforms to local regulations 】

USA (FDA, 21CFR)	EU (EC No 1223/2009)	China (IECIC list)
Canada (DSL)	Australia (AICS)	Korea (Korean Cosmetic Law)
